

The Best Websites To Learn More About Data Science & Machine Learning

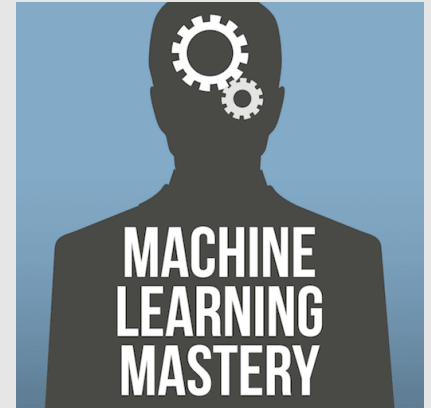

Kaggle

The Kaggle logo, featuring the word "kaggle" in a lowercase, blue, sans-serif font.

Kaggle is perhaps the most important entry on this list. Kaggle is not just a free website, but Kaggle is also a community that supports high-quality Data Science, Machine Learning, and Deep Learning projects, among many other options available.

Machine Learning Mastery

The Machine Learning Mastery website (by Jason Brownlee) provides some of the best resources and content available on the internet. It covers multiple topics and goes in-depth into some of the most spectacular and intriguing concepts of Data Science.

This website provides content and useful resources for every single enthusiast and aspirant. It does not matter if you are a beginner or expert, there is a lot of incredible value you gain upon your visit to this site, and most of the content here is free.

Papers With Code

Papers With Code, as the name suggests, involves research papers with concise codes attached to them.

It is an amazing platform and a completely free website for all enthusiasts to visit and learn more about Data Science, Machine learning, Deep learning, and so much more.

GitHub

GitHub is the best place to find detailed codes and coding architectures. The main reason to use GitHub is to learn from so many brilliant people who provide detailed codes for the entire community to benefit from.

With GitHub, you can not only read and learn from other codes, but you can also utilize these codes on your Desktop by forking them. You can test these codes, validate them, and even modify them to suit your best interests according to your desired projects.

PyImageSearch

PyImageSearch (by Adrian Rosebrock) is one of the best websites for you to get started with computer vision projects. It also extensively covers topics of OpenCV and deep learning to build simple and complex computer vision projects for free.

Towards Data Science

The logo for Towards Data Science, featuring the text "Towards Data Science" in white serif font on a dark blue rectangular background. A thin white horizontal line is positioned below the text.

Towards
Data Science

Towards Data Science is one of the biggest publications on Medium that is one of the best websites for the viewers to acknowledge thoughts, ideas, codes, and information related to Data Science, Machine Learning, Visualizations, computer vision, and so much more.

Google AI

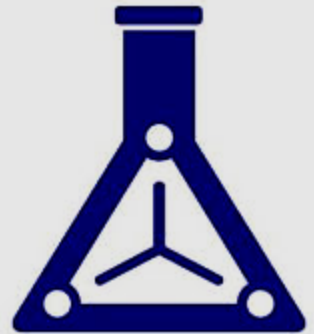

Google AI is a division of Google dedicated to artificial intelligence. The website is also free and provides information related to Data Science and Machine learning.

Google AI wants to educate all users on the benefits of artificial intelligence, and hence it is a great resource being a free website to learn and gain more knowledge about AI.

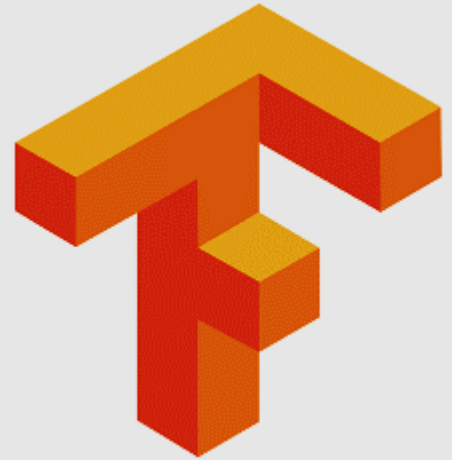

Elite data science

Elite Data Science is for time-constrained professionals and beginners who are looking for a simple path to data science and learn only the most relevant, commercially-viable tools and best practices. They skip the non-essential theory and math and instead take you through the most direct path to applying DS and ML at a professional level.

TensorFlow

TensorFlow is one of the best deep learning frameworks to develop some stupendous Data Science and Machine Learning projects.

However, apart from this amazing library employed for solving complex computational problems, it also has a free website to understand and gain knowledge about TensorFlow.

Analytics Vidhya

Analytics Vidhya is managed by Team AV and provides a community-based knowledge portal for Analytics and Data Science professionals. Their goal is to become a complete portal serving all knowledge and career needs of Data Science Professionals.
